

# STUDENT SUCCESS

**FORMER ST MICHAEL'S STUDENT ZAK, HAS GAINED AN APPRENTICESHIP WITH PD PORTS CONSERVANCY!**

Name: **Zak**

Lives: **Billingham**

Age: **22**

Course: **Welding/ Fabrication**

The best bit about NETA is there are no limits set on driven students. There's great potential for your self learning and a wide variety of equipment and tools.

Why I chose NETA...

The 22-year-old from Billingham said: "I chose this area as it was job specific to allow me to work on vessels, boats and steel structures. I would recommend NETA if you know what career you wish to pursue. NETA is also engaging and has invested in tutors from specific trades which is great."

Next Steps...

Zak is hoping to become a full time served marine engineer or ship welder.
