

Level 3 Electrical Apprenticeship

Introduction: An Industrial Electrician is responsible for installing/repairing and maintaining a range of electrical equipment in a variety of installations and industries from houses, offices to multi-million pound power generation, chemical, food processing and steel companies. Electrical technicians are highly skilled in a wide variety of electrical engineering tasks and play a vital role in ensuring the safe and efficient operation of electrical control systems.

Key Facts:

Course Duration	Typically 42 to 48 months
Attendance Time	Dependant on Employer requirements
Pre-qualification Requirements	You will study functional skills in English and Maths, if you haven't already achieved GCSE grade A*-C/9-4 in these subjects.
PPE supplied	Yes

How will I be assessed? You will be allocated a course tutor/assessor to provide guided learning and support with assignments. You will be observed in the workplace by your allocated assessor.

What will I learn? You will learn how to read drawings, measure and mark out, how to use hand tools and electrical test equipment. You will also be taught how to diagnose faults and how to design basic electrical power systems.

Why choose NETA?

- You'll learn in a real working environment
- You'll receive excellent teaching and learning
- We have strong links with business and employers
- All of our Tutors are industry experienced
- Excellent progression opportunities
